PROFESSIONAL SUMMARY

Software Engineer with 2+ years of experience shipping scalable fintech, SaaS, and e-commerce applications, including payments platforms integrated with Paystack and Flutterwave. I build full-stack products end-to-end with React, Next.js, TypeScript, Node.js, NestJS, and Java Spring Boot — improving performance, reliability, and user experience. I turn complex problems into clean, maintainable code that delivers measurable business impact.

EXPERIENCE

Carticom · Software Engineer

May 2026 – Present

- Designed and developed a multi-tenant AI-powered commerce platform using Java Spring Boot, Next.js, PostgreSQL, and Redis.
- Implemented secure payment workflows, escrow transactions, role-based access control, and Paystack and Flutterwave integrations.
- Built backend APIs and responsive frontend features while contributing to system architecture, testing, debugging, deployments, and continuous platform improvements.

BanffPay Limited · Backend Engineering Intern

May 2026 – Nov 2026

- Collaborated with backend engineers on Java Spring Boot microservices supporting fintech payment infrastructure and backend services.
- Integrated and tested third-party payment APIs, verified REST endpoints with Postman, and participated in debugging and validating transaction workflows.
- Worked within an enterprise microservices architecture while learning and applying backend engineering, API integration, testing, and software development practices.

Meu Deliver · Software Developer

Jun 2025 – Dec 2025

- Developed backend services with NestJS and PostgreSQL for authentication, orders, delivery, and user management.
- Built responsive frontend applications with Next.js and TypeScript for customers, vendors, and riders.
- Collaborated with product, design, and engineering teams to develop features, optimize database operations, troubleshoot issues, and improve application reliability.

Accessivo · Frontend Engineer

Aug 2025 – Jan 2026

- Built responsive and accessible user interfaces using React, Next.js, TypeScript, and Tailwind CSS with reusable component architecture.
- Integrated REST APIs and implemented frontend state management and data flows for fintech applications.

- Collaborated with designers and backend engineers on feature development, debugging, code reviews, and maintaining a scalable frontend codebase.

59Minutes Print · Software Engineer

Jan 2025 – Dec 2025

- Developed and maintained responsive frontend features and reusable UI components for a printing and e-commerce platform.
- Built backend APIs supporting product ordering, vendor management, authentication, and business operations.
- Collaborated across product and engineering workflows on feature development, debugging, deployments, code reviews, and technical documentation.

EDUCATION

Federal University of Technology Minna

2023 – Present

B. Tech in Information Technology

SKILLS

Programming Languages: Java, JavaScript, TypeScript, PHP

Frontend: React, Next.js, React Native, Expo, Tailwind CSS

Backend: Node.js, Express.js, NestJS, Spring Boot

Databases: PostgreSQL, MySQL, MongoDB, Redis, BigQuery

APIs & Protocols: GraphQL, REST, gRPC, WebSockets

Messaging: RabbitMQ, Google Pub/Sub

Cloud & DevOps: Git, GitHub, Docker, Kubernetes, GitLab CI/CD, Postman, AWS, Azure, Oracle Cloud, Vercel, Render

Architecture & Engineering: Microservices, API Integration, AI Integration

Testing: Jest, JUnit, Postman

Methodologies: Agile, Scrum

Concepts: Object-Oriented Programming (OOP), SOLID Principles, ACID Transactions, Design Patterns
